## Measurement Instructions For Custom Halter or Hackamore

The best method to obtain measurements is by using a tape measure and a piece of string. Use the string to take the actual measurement on the horse, then lay the length of string next to the tape measure for the actual measurement.

After obtaining the measurements, email the information to: [info@silverdollarqh.com](mailto:info@silverdollarqh.com)

Or you can print this form and fax to: (970) 858-0655 Please include the measurement next to the respective letter.

If ordering by mail, please submit this form with the necessary measurements along with your payment to:

**David and Debra Rowe**  
**2072 J. Road**  
**Fruita, Colorado 81521**

\_\_\_\_\_A. The circumference of the nose where you would like the nose band to rest. Be sure not to have the string to snug, leaving some room.

\_\_\_\_\_B. The distance from where the lead rope or reins attach to the knot under the throat latch. This measurement determines how close the knot will rest under the jaw.

\_\_\_\_\_C. This measurement is from the knot under the jaw at the throat latch to where the halter or hack will be tied.

Complete the following information or include in an email along with measurements.

Name: \_\_\_\_\_

Address: \_\_\_\_\_ City: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_
